DETAILED ACTION

This Office Action is in response to the amendment filed on 04 April 2007.

Claims 17, 27, 30, 101, 125, 146 and 174-177 are pending.

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. §112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. §112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

The rejection of claims 101 and 125 under 35 U.S.C. §112, second paragraph, as being indefinite is maintained. The recitation "a complement thereof" is indefinite with respect to the length of the sequence. The recitation "immunogenic" is not technically applicable for describing a nucleic acid. This rejection can be obviated by the following claim amendment:

101. A pharmaceutical formulation comprising a nucleic acid molecule comprising at least 8,000 contiguous nucleotides of the sequence of SEQ ID NO:15, or the full-length complement thereof, and a pharmaceutically acceptable carrier.

The rejection of claims 115, 135 and 165 under 35 U.S.C. § 112, first paragraph, as failing to comply with the enablement requirement is withdrawn in response to Applicants' claim cancellation.

The rejection of claims 175-177 under 35 U.S.C. § 112, first paragraph, as failing to comply with the bio-deposit requirement is withdrawn in response to Applicants' submission of the certificate of deposit under Budapest Treaty.

Claim Rejections - 35 USC § 101

35 U.S.C. §101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 175 and 176 are rejected under 35 U.S.C. §101 because the claimed invention is directed to non-statutory subject matter. Claims 175 and 176, as written, do not sufficiently distinguish over cells that exist naturally because the claims do not particularly point out any non-naturally occurring differences between the claimed products and the naturally occurring products. In the absence of the hand of man, the naturally occurring products are considered non-statutory subject matter. *See Diamond v. Chakrabarty*, 447 U.S. 303, 206 USPQ 193 (1980). The claims should be amended to indicate the hand of the inventor, e.g., by insertion of "Isolated" or "Purified" as taught by page 18 of specification. See MPEP 2105.

This rejection can be obviated by the following claim amendment:

175. An isolated host cell comprising the isolated nucleic acid molecule of claim 17 or 146.
